

Codima Toolbox

Overview

Codima Technologies has developed Codima Toolbox, best in class tools for network management.

Codima Toolbox delivers VoIP network management and Inventory and Visual Mapping tools with modules, making it a truly unique versatile software solution.

VoIP Network Management

Codima offers unrivalled 'beginning to end' VoIP network management.

This includes network pre-assessment tools, traffic simulation, and post deployment monitoring and troubleshooting modules that help minimize downtime and ensure successful VoIP implementations.

Infrastructure Inventory Management

Codima Inventory and Visual Mapping tools using Microsoft® Office Visio®, automate processes to help reduce costs, save time and improve asset management.

Maps can be viewed by multiple users on a web page and are easily presented to others facilitating auditing, planning and decision making. autoMap™ and autoAsset™ are Avaya Compliant. autoMap™ is represented at Microsoft® Office Marketplace.

- ▶ One-Click Management™ delivers critical information in real time for VoIP networks with speed and ease
- ▶ Highly graphical - visualizes information using well known Microsoft® Office Visio®
- ▶ Easy to use and deploy - minimal configuration
- ▶ Cost efficient - in maintenance, training administration and planning capacity
- ▶ Flexible and scalable - a set of tools easy to integrate, combine and scale
- ▶ Topology drawings can be saved on a web server and viewed on a web page
- ▶ Able to produce extensive reports - in depth information making troubleshooting much more effective
- ▶ Flow analyzing, RTP analyzing, Call Playback, Traffic Simulation and testing available for VoIP networks
- ▶ Remote Management enables remote managing of VoIP networks

autoVoIP™	autoVoIP™ Consultancy Kit	autoVoIP™ Traffic Simulator	autoMap™	autoAsset™	autoAnalyzer™ Consultancy Kit
					
Monitors and Troubleshoots VoIP networks with easy to use One-Click Management™	Monitors, Maps Analyzes with Flow analyzer and RTP analyzer up to 1000 phones, and is available for laptop PC	Simulates traffic and tests VoIP networks	Maps any infrastructure or a VoIP network using Microsoft® Office Visio®, plus Discovers and Reports on any software or hardware	Discovers and Reports on any software and hardware in any infrastructure	Analyzes, Maps and Troubleshoots any infrastructure in Real time with Remote Management
